

Fire Investigation Capabilities

SERVICES AND EXPERIENCE

AWARD-WINNING PARTNERS IN FIRE SAFETY

Fire Check Consultants is one of Australia's independent and dedicated fire safety consultancies operating across all sectors. With a highly respected and experienced team of fire safety consultants, Fire Check Consultants have a proven track record of innovative and cost-effective design, fire protection system design, fire advisory services, fire investigation matters, unwanted alarms and many more. As a result, we assure our clients that our professional service is the best at a competitive price and ensure the highest quality of work, including on time in full and within budget and completed without hassle.

EXPERIENCE

Fire investigation, sometimes referred to as origin and cause investigation, or fire scene examination, is the analysis of fire-related incidents. After firefighters extinguish a fire, an investigation is launched to determine the origin and cause of the fire. Investigations of such incidents require a systematic approach and knowledge of fire science and engineering.

The fire investigation is part of forensic science. Our fire investigation services include proper inspection of the venue after the fire extinguishment, where we collect all the remaining evidence and try to ascertain the reason behind the fire occurrence.

Though it is crucial to determine all the aspects of fire incidents and collect all the evidence, we are known for providing the best fire investigation in Australia. We contact eyewitnesses to obtain the maximum information about the fire's origin and subsequent spread. Also, we contact other departments such as the local fire brigade, electricity department, oil company, local civic authority or structural engineer to conclude.

Fire Check Consultants have gained the trust of various government and legal agencies by endowing the best fire investigation services. Our expertise is the sole reason for the assurance we provide to our clientele. Our fire investigation services can endow you with timely resolution without causing any delay, as we can comprehend the evidence very well.

Right from the collection and interpretation of the documentation of evidence, we conduct the whole investigation process with a methodology. We make sure that we are getting the systematically and scientifically approved framework for determining the cause and origin behind the fire incident. Once the investigation has been concluded, we can decide if a Deemed-to-Satisfy approach or Performance Solution approach to reconstruction is the best way forward.

If you are looking for fire investigation Brisbane based company, then you must contact us as we have expertise in residential, industrial, and many more areas.
